

infinias Single Door Add Kit with 3xLOGIC Prox Reader

The infinias Single Door Add Kit with 3xLOGIC Prox Reader includes needed door hardware and accessories to add a single door to your network and deliver an effective, easy to install IP-based access control solution. The single door kit includes an infinias Ethernet-enabled single door controller, 3xLOGIC prox reader, mounting box, plus other needed accessories, so you can add a door to your network and get started with your IP-based access control solution quickly and easily. The reader is equipped with a 9ft cable, reducing installation time by eliminating the need to splice wires and troubleshoot unnecessary wire connections. Great for retrofit installations when existing door and locking hardware is not required.

Key Features & Benefits

- Simple to install
 - ▶ Mounts at the door with a surface mount box.
 - ▶ 9ft 3xLOGIC Prox reader cable simplifies wiring and helps to standardize on installs.
 - ▶ Cloud Ready by default.
 - ▶ Install and Test using Site Access Mobile App.
- Door controller connects to the closest network switch with a single Cat5/Cat6 cable.
- Power over Ethernet (PoE) carries both data and power for both controller and door peripheral hardware.
- 3-state alarm monitoring and anti-passback for enhanced security.
- Buffers up to 16,000 local events when disconnected from the host (so events are never lost).
- Secure transmissions with end-to-end AES 128-bit encryption.
- Features 32-bit processor for enhanced speed and performance.
