

## infinias® CLOUD

infinias CLOUD delivers broad access control capabilities to conveniently secure and manage user location(s), within a simple, intuitive, browser-based interface. This cloud-based solution makes access control practical and affordable for any user, regardless of technical experience or business size. User's can easily view, monitor, and report on any or all events and alarms; define multiple security roles, and access privileges for individual users. The powerful rules engine allows a customer to build the functionality they need such as Lock-down, First-in, last-out, n-man rule and much, much more.

- **Simple**
- **Affordable**
  - ▶ No Server, No Maintenance
  - ▶ Automatic Updates When Available
  - ▶ Pay as You Go and Only for What you Need, i.e., per Door/Activated Credential
- **Infinite Scalability**
  - ▶ Unlimited Doors, Cardholders, Credentials
- **Mobile Event Monitoring with Integrated Video**

**Customizable Rules Engine:** In addition to common access control features, our powerful rules engine allows flexibility in providing users the ability to build customer tailored functionality specific to their needs.

**People and Groups:** Easily manage people, groups, roles, privileges, and credentials from a simple user interface.

**Door Status:** Simple icons provide a quick visual reference for door status monitoring.

**Customer Portal:** Manage an unlimited number of customers and eIDC<sup>32</sup> controllers right from your web browser. Users can utilize the customer portal's single sign-in feature for ease of billing, account modification and controller provisioning.
