1 View Lite II – VIGIL Server – Compatability Requirements

3xLOGIC’s View Lite II mobile app (iOS and Android) is compatible with VIGIL Server **v7.10.0140** or later systems.

1.1 Pre-7.10.0140 Systems

On VIGIL v7 systems predating v7.10.0140 (i.e VIGIL Server v.7.10.0085), a full VIGIL Server update to the required version is unnecessary. Only a .dll patch to v7.10.0140 or later is required (`VigilServerDLLPatchv7_10_XXXX.vgl`).

Contact a 3xLOGIC representative to acquire the required .dll patch file.
