

## VIGIL Software Suite

VIGIL Server software is the core program all other 3xLOGIC applications are built upon. With our Easy Setup Wizard to guide you through installation, you will be up and running in minutes. Designed with limited bandwidth in mind, Server utilizes our proprietary RapidStream Technology and Substream Motion Detection capabilities to provide high resolution over low bandwidth networks. Server is compatible with all ONVIF Profile S cameras, which includes 3xLOGIC's Time of Flight, Thermal, and V- and S-Series cameras, as well as boasting a large library of more than 150 Point-of-Sale integrations.

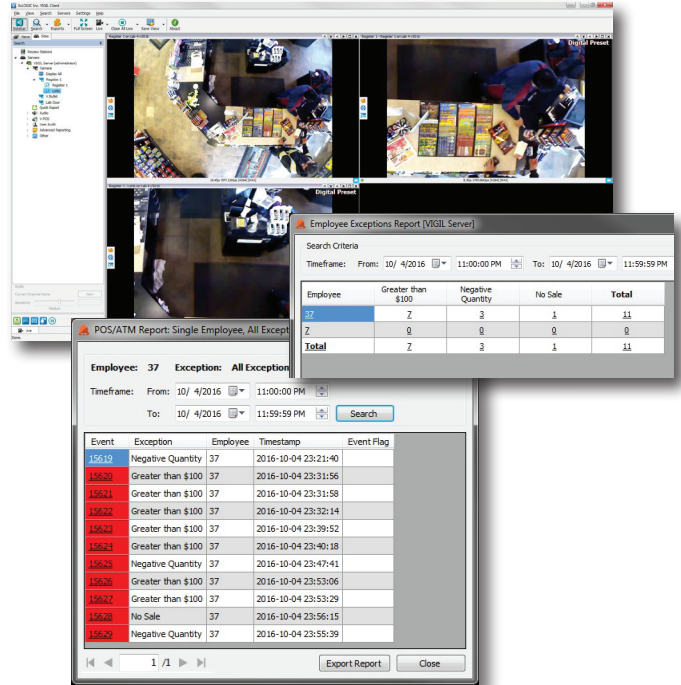

VIGIL Client gives you unrivaled access to live and recorded video from any of your networked NVRs. Advanced playback and intelligent SmartSearch™ functionality lets you identify and review events of interest quickly and easily. The result is a more accurate and efficient investigation of incidents with simple export of evidence material.

Additional software packages are available, including POS, Video Analytics Reporting, and VCM for centralized health monitoring and management. Download our free mobile app, View Lite II for your Android or iOS device.

### New in Release 9.5

- **Advanced POS and Video Analytics Reporting:** View your Video Analytics from V-Series and Time of Flight cameras and POS Exception data in an easy to read and export report.
- **Digital PTZ Presets:** Create custom digital PTZ presets with a fixed camera with the ability to associate them with POS data.
- **Export as a Background Process:** Continue to use VIGIL Client while you export video.
- **Remote Update Utility:** Automatically check for, download, and/or install updates for VIGIL Server/Client and VCM Server/Client from either the 3xLOGIC Cloud or your own FTP.
- **Email Overview:** Remotely manage all of your email events for a Server in one place through VIGIL Client.
