

VIGIL 9.5 Release Notes

VIGIL SERVER

- Added support for VISIX S-Series cameras in VIGIL Video Verification
- Added support for recording audio and video to same drive partition
 - ▶ No separate audio partition required
- Added Digital PTZ Presets
- Added sub-stream support for RTSP and exposed sub-stream field on the Network Camera settings form
- Added Support for receiving alarm events from V-Series cameras as ONVIF DI
- Added H.265 support to VIGIL Server HTTP interface

VIGIL CLIENT

- Added VCM Multisite for Managed by VCM mode
- Added Advanced Reporting for Dwell Time Analytics
- Added Advanced Reporting for People Counting
- Added Advanced Reporting for Advanced POS Exception
- Added full range support for Windows Display scaling
 - ▶ Fixes icon and window sizing issues in high resolution monitors
- Added Email Overview Settings tab in the Server Settings form
 - ▶ Allows all email for a Server to be configured through VIGIL Client
- Added feature to allow for local exports as a background process
 - ▶ Ability to start an export and continue using VIGIL Client
- Added isolated installation support
 - ▶ Allows for different versions of VIGIL Client and VCM on the same computer

VCM

- Added “Monitor Days of Audio Storage” metric to Health Monitor
- Added warning prompt directing users to update VIGIL Server to 9.0 before attempting to update a pre-9.0 VIGIL Server to 9.5 or later
- Added ability to Email Site Contact (as opposed to central email address for all VCM-managed sites) for VPOS Exception Notifications
- Added isolated installation support for VCM Client
 - ▶ Allows for different versions of VIGIL Client and VCM on the same computer
- Added editable, freeform Notes column in Health Monitoring

DVPLAYER

- Added ability to exit unused layout frames to enlarge layout frames with active playbacks
- Added variable speed control to playback tools
 - ▶ Use 4x, 8x, etc. FF and Rewind like VIGIL Client
- Added support for exporting up to 24 hours. Increased from previous maximum of 8 hours
- Added support for optionally copying a file from DVD to local hard drive before playback initiates, to improve playback experience from CD/DVD media

REMOTE UPDATE UTILITY

- Remote Software Update Utility created to pull updates for VIGIL Server, VIGIL Client, and VCM
